ABOUT F&L ATTACHMENTS

At F&L, we supply a wide range of excavator attachments, bulldozer ripper shanks, and loader attachments.

All our attachments are designed and manufactured to meet your specific working condition, they can be suitable for applications of construction, earthmoving, demolition and mining.

For each application, we choose material differently and scientifically, using Hardox400 or Hardox450 wear plates, high strength anti-wear plates NM400, and low carbon alloy plates Q345B. Each attachment is with a unique production ID, which makes quality tracking possible even after the product is delivered.

Our attachments include general purpose buckets (standard digging buckets), heavy duty buckets, rock buckets, skeleton buckets (sieve buckets, screening buckets), cleaning buckets (ditching buckets), V-shaped buckets (trapezoidal buckets), hydraulic tilting buckets, 4-in-1 grab buckets, clamshell buckets, ripper, rock grab, root rake, compaction wheel, excavator grapple, excavator thumb, excavator shear, and more.
